SUMMARY

Software Engineer (Backend / Full-Stack) with ~1 year of experience building event-driven, real-time systems in Node.js and TypeScript, now focused on Agentic AI and GenAI engineering. Built RAG pipelines with hybrid search and contextual compression, and multi-agent systems using LangGraph (supervisor, specialists, map-reduce, human-in-the-loop). Strong DSA foundation (600+ problems solved).

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, SQL
Agentic AI / GenAI: LangGraph, LangChain, RAG (hybrid search, multi-query, contextual compression, parent-document retrieval), Multi-Agent Systems, Tool Calling (ReAct), Pinecone, ChromaDB, LangSmith, LLM Evals
Backend: Node.js, Express.js, NestJS, FastAPI, REST APIs, Event-Driven Architecture, Microservices
Frontend: Angular, React.js, Next.js
Databases & Tools: MySQL, PostgreSQL, MongoDB, Redis, Apache Kafka, RabbitMQ, Docker, Git, CI/CD, Socket.IO, WebRTC, Razorpay

EXPERIENCE

MapmyIndia — Associate Software Developer July 2025 – Present

- Applied security best practices including input validation, error handling, and modular architecture to improve code quality and maintainability.
- Optimized frontend and backend pipelines, achieving 40% faster page loads and reducing server error rates.
- Implemented Redis for temporary data storage and task queuing, offloading workload from the main database.

Comely Enterprises Pvt. Ltd. — Full Stack Developer Intern Jan 2025 – May 2025

- Built and maintained scalable cross-platform applications using Angular, AngularJS, React Native, Express.js, Redis, and MySQL; improved development efficiency by 25% through modular, reusable code.
- Designed and deployed secure RESTful APIs with Node.js and Express.js, reducing response times by 30% and ensuring high reliability under concurrent load.

PROJECTS

DevAgent — Multi-Agent Coding Assistant LangGraph · Python · Tool Calling · pytest

- Built a supervisor-based multi-agent system where a Supervisor triages tasks and delegates to Planner, Coder, and Reviewer/Tester agents, with failure handoffs back to the Coder until tests pass.
- Gave agents real tools (file read/write, pytest execution, linting) via the ReAct tool-calling pattern, and fanned out multi-file work in parallel using the LangGraph Send API with map-reduce over shared state.
- Added checkpointing, human-in-the-loop approval, and LangSmith tracing for observability and safe, resumable runs.

Company Docs Assistant — Production RAG Chatbot Node.js · LangChain · Pinecone · Gemini Embeddings · Groq (Llama 3.3 70B)

- Built a RAG chatbot over internal PDFs with an ingestion pipeline (PDFLoader, recursive chunking) and a custom adapter for Gemini embeddings indexed in Pinecone for top-k similarity retrieval.
- Upgraded retrieval quality with hybrid search, multi-query retrieval, and contextual compression; grounded answers from a Groq-hosted Llama 3.3 70B model with source-based responses.

KuKu Fun — Real-Time Chat Application Next.js · Node.js · Socket.IO · PostgreSQL · Redis · Kafka

- Scaled real-time chat with Socket.IO and a Redis adapter for distributed presence and cross-instance room routing across multiple server instances.
- Integrated Apache Kafka (SASL/TLS) for async processing of DMs and notifications with graceful degradation to direct delivery; added Redis caching (5-min TTL) and a sliding-window rate limiter (30 DMs/10s).

API Monitoring & Analytics Platform — SaaS Architecture Angular · Node.js · RabbitMQ · MongoDB · Docker

- Architected an event-driven monitoring system with a RabbitMQ producer-consumer pattern, plus Circuit Breakers, Retry Strategies, and Dead Letter Queues for 99.9% message durability; containerized with Docker Compose.

EDUCATION

Maharaja Surajmal Institute of Technology, Delhi — B.Tech in Electronics & Communication Engineering Dec 2021 – May 2025
CGPA: 7.9
